Hi Rene,

Please see the email below regarding public comment for the 4/29 meeting.

Thank you,
Andrea

Subject: For Board meeting April 29 - public comment

To the Board of LARPD,

This email is a request to get on the agenda for an LARPD facilities meeting for discussion of the feasibility of installing a stepping stone public art project.

Here is a description of the project and photos attached.

Artist Thomasin Dewhurst and myself were awarded a grant for a public art project that was funded by the Alameda County Clean Water Program. We created 5 large stepping stones (3' diameter each) and 2 small stepping stones (18" diameter) that tell the story of water that falls, follows the creeks, and ends in the Bay. Originally, The City of Livermore had agreed to install them in the Springtown green space but now they said they have a hold on all art projects. Thus, I was hoping to see if LARPD might agree to have them installed as public art; ideally at Sycamore or another such space that is public. They are made of cement with wire support running through each stepping stone, mosaic beads and cement paint. They are about 2.25" thick. We included student artists to help with the project so it was very much a community project.

Ideally, we have a timeframe of installation by the end of June. The stepping stones are done and ready. Thank you for your help and I look forward to sharing the project with the LARPD Board in the public comment section of the April 29 Board meeting.

Warm Regards,

Anne Giancola
